

Project Scope Group 14

Our project is a website which tracks natural disasters around the world, for example wildfires (which will be included in our first version). This website raises awareness of ongoing and past natural disasters, such as the impact locally and globally.

Features:

- Map with fires
- Mapping wildfires.
- Approximating the amount of trees burnt down.
- Approximating speed of spread.
- Approximating which fire to prioritize.
- Damage to wildlife
- Damage to environment

SDGs:

- SDG 13 - Take urgent action to combat climate change and its impacts.
